Safe as a Bank!

Why do you so often hear that expression?

What makes banking the safest business?

What does this mean to you?

If You Are a Banker:

You believe in figures—accurate figures, and enough of them to show clearly just where your business, or any borrower's business stands.

Therefore you believe in the business principle embodied in Burroughs Machines, in their accuracy, time-saving, and profitable service to business.

Doubtless you post your ledgers on a Burroughs—most banks do—but

are you familiar with all the ways Burroughs can serve you?

Have you seen the application of Burroughs Calculators to interest and analysis, or of other Burroughs Machines to teller's proof, transit letters, check and deposit journals, and many other bank uses?

If not, ask us for information, you'll find it interesting.

If You Are a Business Man:

You certainly desire to run your business as well as the banker does his—to be sure that accounts are posted, balanced and proved daily;—to have an automatic check on over-extension of credit, to make prompt collections and avoid bad debts.

Then why not do it? It requires no big investment—you can buy a Bur-

roughs Machine on easy terms. You will be surprised to see how quickly it will pay for itself, by preventing costly mistakes, saving time, and giving you a check on all your operations.

If you don't feel sure that it will more than pay its own way, we don't want you to take it. Call us on the telephone and let's talk it over.
